Dive into
the world of
Native Spirit.

For technical reasons, the colours printed in this catalogue have no contractual value and may differ from reality. Any typographical errors in this catalogue is not binding on Native Spirit in any way whatsoever. Photo credits of this catalogue: Alice Lévêque.

This catalog is printed on 100% recycled paper certified European Ecolabel. This certification guarantees the use of paper through sustainably managed forests or from the recycled chain. Ecolabels make sure that concerned products and services meet with the high level of requirements in terms of ecodesign and respect of the environment, while maintaining their level of performance. The printer of this catalogue is also working in compliance with the «Imprim'Vert» charter, promoting actions to reduce the impact of their activities on the environment: proper disposal of dangerous waste, prohibition of toxic substances, secured storage of dangerous liquids, monitoring of energy consumption and promotion of environmental awareness among both employees and customers.

of our clothing are
made from organic
cotton

31

of our garments
are designed using
recycled materials

53

of our products are
GOTS* certified

*The GOTS (Global Organic Textile Standard) certification is the strictest when it comes to textiles made from organic fibres.

A responsible collection 01

Creating a responsible brand was the number one objective for Native Spirit and, from the very start, we have chosen recycled, organic and environmentally friendly materials to produce our garments.

Local supply networks 03

Our efforts to develop our European production reflect our commitment and desire to be part of more environmentally friendly fashion.

Our guiding principle: reduce distances where possible and produce in neighbouring countries such as Portugal, Spain or Italy to reduce our carbon footprint.

Infinite personalisation options 05

Designed to allow full creative scope, we have developed materials and finishes selected specifically to allow easier personalisation and all types of textile marking techniques.

From embroidery to patches, transfers or printing, our garments are designed to help you transform your visions into reality!

Ethical production 02

As part of an approach based on trust, and to ensure ethical and completely transparent production, we choose to work only with production factories that meet certification standards such as WRAP, SA 8000 and BSCI.

In 2023, to go even further, we have joined AMFORI: a tool that allows us to monitor our supply chain with the aim of improving our environmental and social performance to ensure open and sustainable trade.

Inspiration from nature 04

Nature influences each step in the development of our collections. From sustainable materials to colours inspired by nature and daily encounters, we draw our creativity from the present and past to design the fashion of tomorrow. Going back to basics and celebrating our planet is our key aim.

Respect for the highest social and environmental standards is deeply rooted in the values of Native Spirit. In order to go even further in our CSR approach, in 2023 we are joining AMFORI, one of the leading associations for international businesses supporting open and sustainable trade.

AMFORI helps track our supply chain to make everyone involved more prosperous, to use natural resources responsibly and to promote open global trade. Ethical, transparent and sustainable, major challenges that begin right at the start of the chain. Correct application of standards linked to sustainable development can be checked through regular audits of our suppliers, such as BSCI (Business Social Compliance Initiative) and BEPI (Business Environmental Performance Initiative) audits.

Based on the BSCI Code of Conduct, we are committed to working with our suppliers to improve the social context and working conditions in their factories. The BEPI audit service offers a practical framework aimed at reducing the environmental impact of our supply chain on aspects such as energy consumption, reducing greenhouse gas emissions and managing chemical substances.

At Native Spirit, putting sustainable trade at the heart of our business is our priority.

01
To enhance the
well-being of
society

02
To use natural
resources
sustainably

03
To promote open
global trade

our labels

We pay particular attention to the composition of our clothing, which is why we're committed to professionals by offering clothes and accessories that are certified and controlled by strict and recognised labels.

We have built a relationship of trust with our partners, carefully chosen for their social, ethical and environmental commitment. All our factories are certified by one or more of these certification labels and are committed to using controlled and approved materials in the production of our collections.

GOTS

The GOTS (Global Organic Textile Standard) certification is the strictest when it comes to textiles made from organic fibres. It tracks the entire production chain from the cotton fields, through harvesting, yarn manufacturing, piece assembly, the finished product before printing, and even clothing export.

EGL N°165651 / NATIVE SPIRIT

OCS 100 & OCS BLENDED

The OCS (Organic Content Standard) certification is dedicated to items designed with a minimum of 5% and a maximum of 95% organic raw materials blended with conventional or synthetic raw materials.

EGL N°165651 / NATIVE SPIRIT

EGL N°165651 / NATIVE SPIRIT

EGL N°165651 / NATIVE SPIRIT

RWS

The RWS (Responsible Wool Standard) is a voluntary international standard that addresses animal welfare on sheep farms and throughout the wool chain of custody from certified farms to the finished product.

EVE VEGAN

The EVE VEGAN label guarantees that our products are free from ingredients resulting from the commercial exploitation of animals (products from farming, slaughter, hunting and fishing) and not tested on animals.

GRS

The GRS (Global Recycled Standard) aims to control the recycled content of intermediate and finished products. This is to ensure that the manufacturing process, social and environmental practices of companies are sustainable and responsible. It guarantees the requirements and accuracy of the certification issued.

EGL N°165651 / NATIVE SPIRIT

EGL N°165651 / NATIVE SPIRIT

RCS 100 & RCS BLENDED

The RCS (Recycled Content Standard) standard checks the presence and proportion of recycled content in a product. The production chain is carefully verified by a third-party organisation to guarantee transparency. RCS 100 contains a minimum of 95% recycled materials. RCS Blended contains a minimum of 5% and a maximum of 95% recycled materials.

OEKOTEX

The “confidence in textiles - harmful substances according to Standard 100 by OEKO-TEX®” label is an international certification that meets the needs of stakeholders in the textile supply chain and consumers in terms of protecting human health. This certification guarantees the absence of harmful substances or those that may present a risk to health and the environment.

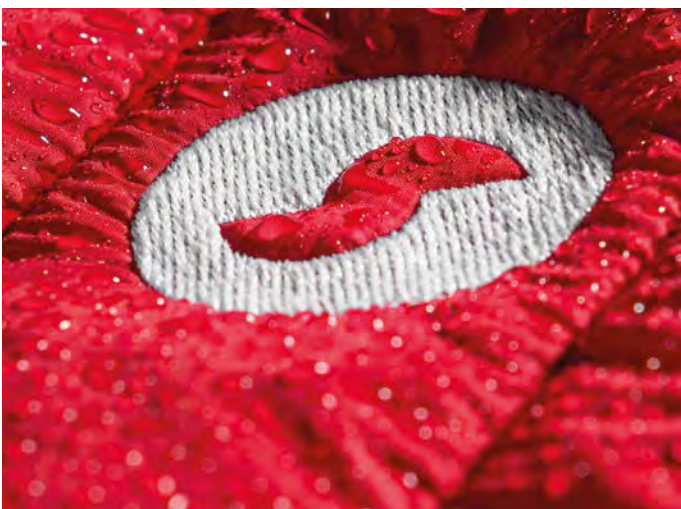

SORONA®

Sorona® is a partially plant-based polymer. A new and innovative material, it used in the padding of our down jackets and is an eco-responsible alternative to replace fur or other animal feather paddings. Sorona® is a trademark registered by Affiliates of DuPont de Nemours, Inc. used under licence.

TENCEL

TENCEL™ fibres (Lyocell and Modal) are eco-responsible materials with a low environmental impact. Derived from wood, these renewable raw materials are produced sustainably and are environmentally friendly. TENCEL™ is a trademark of Lenzing AG.

high quality standard

Our collections are designed to help you transform your visions into reality.

Each of our garments has been developed to allow easier personalisation: a smooth and hard-wearing surface, different textures to suit your needs, materials tested and approved by us for all marking techniques.

Our garments are 100% no label and come with just a tear-off size tag to provide a ready-to-use product that can take on any identity. Fabrics selected with the utmost care, finishes worked in painstaking detail and different weights offer you unmarked products in superior quality that provide extensive scope for textile personalisation to meet your every wish.

Our hard-wearing, durable, comfortable, high quality and environmentally-friendly products provide a creative touch for easier rebranding.

Transfer

The transfer method is an 'iron-on' process. The decoration is heated and then transferred onto the textile for a perfect and long-lasting reproduction.

Screen printing

This is one of the oldest decoration techniques and involves applying ink to a garment using a stencil. The textile fibre absorbs the colours to produce a high-quality decoration.

Embroidery

The most noble decoration technique, embroidery provides great flexibility for markings. The textured threads create a beautiful effect on the fabric and the result is hard-wearing and long-lasting.

Printing

Direct to Garment (DTG) digital printing can be used to reproduce any type of visual. Just like with a printer, the ink is injected directly onto the fabric for a precise and fast result.

inspired by nature

Nature is magical and has always been an inexhaustible source of inspiration for our collections.

Our work is guided by a desire to protect and celebrate our most precious gift, our planet.

We therefore pay particular attention to the colours used in our collection and to production methods.

The beauty of landscapes fascinates us, evokes emotions, suggests ideas and inspires us to create. A creative cycle with the simple aim of a journey around

the planet and its most beautiful landscapes, from Sienna to the Adriatic Sea, passing through the Amazonian rainforest and its lush greens. Going back to basics is a challenge that Native Spirit has embraced since its creation, seeking to move towards a more responsible lifestyle and together create an environmentally friendly future.

Our colours are an ode to nature, an invitation to take up the challenge of responsible fashion.

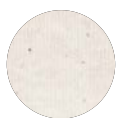

our new colours

Our new colours for 2023 are synonymous with harmony, joy and comfort, designed to bring a creative touch and a breath of fresh air into our everyday lives.

From soft and natural shades inspired by the four corners of the earth to bolder and rawer colours inspired by our encounters.

21 new shades for a colourful take on life!

made in portugal

At Native Spirit, environmental responsibility is at the heart of our design process. Proximity, quality and ethics make Portugal an ideal choice for sustainable production.

Made in Portugal is distinguished by excellent production, thanks to exceptional expertise, as well as a guarantee of good working conditions according to European regulations. Our products reflect our desire to play our part in more responsible fashion, by focusing on local production and European know-how.

Discover our collections produced entirely in Portugal, including Terry Towel and Terry 280, designed from premium, organic and/or recycled materials.

recycled collection

Each year, millions of tonnes of plastic are disposed of in oceans and an equivalent volume of unused textile scraps are thrown away. In view of this finding, Native Spirit has embraced the challenge of more responsible design balancing fashion and sustainability to limit the impact on the planet as far as possible.

This idea was the inspiration for the Recycled Collection: a series of garments designed entirely from recycled cotton and polyester, following the example of craft and design professions in which know-how and experience are resulting in unique items.

Painters, shapers, cabinetmakers, sculptors: sectors where recycling and transformation of materials are at the heart of the design process.

To produce the Recycled Collection, we recover unused fabric scraps from textile production, as well as plastic bottles and used materials. The colour of the selected raw materials determines the shade of the yarn and garment, resulting in a marled appearance.

A unique design process for a raw and authentic collection.

The Recycled Collection is available in four unique colours obtained from recycled materials with no re-dying.

linen

The composition of our garments is an important priority for Native Spirit. To support you in a sustainable and ethical relationship, we have chosen linen, an outstanding eco-friendly material, for some of our pieces.

The cultivation process for this botanical fibre offers many environmental benefits. It requires no irrigation and all it needs to grow is the warmth of the sun and water from rain. This plant needs very little fertiliser, and it is also a valuable ally in the battle against global warming thanks to its roots which trap CO2 in the earth.

As well as its environmental benefits, linen is also a heat-regulating fabric that adapts

to temperature variations to ensure comfort in both winter and summer.

This noble material features in a selection of essentials in our collection with trendy cuts and quality finishes.

From t-shirts to polo shirts, shirts and trousers, linen is joining the Native Spirit eco-friendly wardrobe in new botanical shades including Cool Blue, Stone Grey and Peacock Blue.

Available in models for men and women, these sustainable and hard-wearing garments will enhance your image.

glossary

IN-CONVERSION COTTON

Cotton said to be "in conversion" is cotton grown according to organic standards in its transition period and is certified organic in conversion. It maintains and/or improves soil fertility and uses less water and energy than conventional cotton.

SLUB COTTON

A fancy yarn with flash-shaped irregularities of thickness.

RING-SPUN COTTON

This yarn provides a smoother fabric surface and is softer to the touch. Clothing is more pleasant to wear and offers better printing quality.

FRENCH TERRY

Fleece fabric not brushed. Loop appearance on the inside and smooth outer surface. Light and fluid fit for a current look.

LSF

Low Shrinkage Fleece: high quality fleece with low shrinkage.

The inner and outer faces of the fabric contain a continuous filament that offers excellent resistance to washing. The outer face is perfect for printing, while the inner face is extremely comfortable.

LST

Low Shrinkage Terry: high-quality French terry treated to significantly reduce shrinkage, perfect printing, excellent comfort.

PRE-CONSUMER RECYCLED MATERIALS

Materials that come from waste generated during a manufacturing process. Excluded is the reuse of materials that come from a production process and that can be recovered in the same process that generates them.

POST-CONSUMER RECYCLED MATERIALS

Materials that come from consumption waste generated by households or by industries and businesses in their role as end-users. This includes returns of materials from the distribution chain.

MICRO TWILL

Ultra-fine weave made of thin and flexible yarns that brings style to the material and movement to the garment.

RIP-STOP

Yarns and weft positioned squarely to prevent ripping.

TWILL

The alternating crossing of warp and weft forms diagonals that accentuate the movement of the garment. The resulting material combines comfort and durability.

TERRY TOWEL

Towelling material, a noble and resistant fabric, comfortable in all seasons.

sizing guide (cm)

The Native Spirit size guide for men, women and children will help you choose the right size and create an eco-friendly wardrobe suited to your body type.

Take your measurements on the body itself, without over-tightening. If you're between sizes, go for the larger size.

Measure the breasts at the fullest part and, if possible, with your bra on.

Measure the waist at the narrowest part of the waist.

Measure the hips at the widest part of the hips.

Measure the legs from the top of the crotch to the ground.
